● SAMPLE APPOINTMENT MESSAGES — WHAT WE OPTIMIZE FOR

@priya_kapoor.delhi: "Teeth cleaning appointment available hai? GK-2 clinic location?"

@nehaa.mumbai: "Teeth whitening package price bhejo please. Sensitivity hoti hai kya?"

@ria.bandra: "Clear aligner appointment Thursday ko available hai kya?"

Plain meaning: the reel is not the sale. The reel starts the patient conversation on WhatsApp; your clinic converts that conversation into an appointment.

■ INFRASTRUCTURE TRUST

WE MAKE SURE CREATORS ACTUALLY POST.

× WHY DENTAL CREATOR CAMPAIGNS FAIL

- × **Wrong creator location:** A creator can get views in another city and still bring zero local appointments.
- × **No geotargeting:** Views come from outside the city, not people who can visit your dental clinic.
- × **No ROI tracking:** The service is given, the post goes live, but nobody tracks appointment inquiries.
- × **Creators ghost:** Some creators take the service and never post without a controlled workflow.
- × **Wrong service angle:** Cleaning, whitening, aligners, implants, and kids dentistry need different hooks.

■ REALISTIC PILOT EXPECTATIONS

WHAT ONE LOCAL REEL CAN REALISTICALLY CREATE.

We do not promise fake virality. We optimize for local reach, qualified WhatsApp inquiries, and dental appointment demand during strong service windows.

5K-80K

local reach depending on creator fit, service visual, and season.

3-15

WhatsApp inquiries from local patients asking price, slots, or service details.

1-8

realistic appointments from one strong local reel when the offer is clear.

5/CITY

partner dental clinics onboarded per city to avoid creator overlap.

BEST FIT

Dental clinics
Cosmetic dentists
Orthodontic clinics
Implant clinics
Family dentists

NOT IDEAL FOR

No dentist approval
No Instagram presence
No appointment intake
No weekday slots
No clear service menu

MOST IMPORTANT VARIABLE: the content must feel medically credible and visually clear. Cleaning, whitening, aligners, implants, and smile journeys perform best.
